example ingredients*

*the used examples may be available in your market

new ingredients

In the past year we expanded our portfolio of branded, clinically studied ingredients.

*recently added ingredients may be available in your market

let's meet

Let's meet to discuss which branded and clinically studied ingredients we offer for the health areas of your interest.

At our meeting, we can present the ingredients' **specifications, advantages, mechanisms of action,** and **product examples.**

INDICATIONS
PRENATAL HEALTH
FERTILITY
CARDIOVASCULAR HEALTH
MOOD & COGNITIVE HEALTH

mechanisms of action:

Folate is involved in many processes in the body:

- maternal tissue growth during pregnancy
- normal homocysteine metabolism
- normal psychological function, amino acid synthesis and blood formation
- normal function of the immune system
- reduction of tiredness and fatigue
- has a role in the process of cell division

product examples

A next generation folate source - glucosamine salt of 6S-5-methyltetrahydrofolate (6S-5-MTHF). An active folate the body can use without conversion.

- **supplier**
Gnosis by Lesaffre
- **product grade**
powder
- **daily dose**
200 mcg (100 % RDA)
400 mcg for pregnant women
- **stability**
24 months when stored below 25°C
- **certificates**
Kosher, Halal, Vegetarian, Vegan, approved Novel Food status in EU

Quatrefolic® passes the gastric barrier and is absorbed mainly in the small intestine by a carrier mediated mechanism. The carrier is not saturated and this enables Quatrefolic® to ensure a higher folate uptake.
