

A multifunctional solution for healthy weight

Capsimax is a clinically studied, concentrated extract of red chili peppers that delivers capsaicinoids—the naturally occurring compounds that cause the sensation of heat when consuming spicy foods.

Capsimax Next is produced with Evobead, a controlled-release encapsulating technology that delivers effective levels of capsaicinoids without stomach upset that may result from unprotected extracts of red chili peppers.

Want to get all the benefits of hot red peppers from cool Capsimax Next? Ask us how we can help you capture new opportunities.

PROPRIETARY TECHNOLOGY

Capsimax Next harnesses one of nature's most effective weight management ingredients—hot red peppers—using our Evobead Beadlet Technology. Evobead encapsulates beneficial levels of capsaicinoids, allowing for the consumption of efficacious amounts of these actives without stomach discomfort.

For representative purposes only
