

Cartidyss

MORE THAN COLLAGEN PEPTIDES

Cartidyss® is:

A **type II marine collagen** with **clinical efficacy** on **beauty-from-within & joint health**

A **unique composition** of **collagen peptides & glycosaminoglycans** from natural bioresources

Efficient at **low dosage**

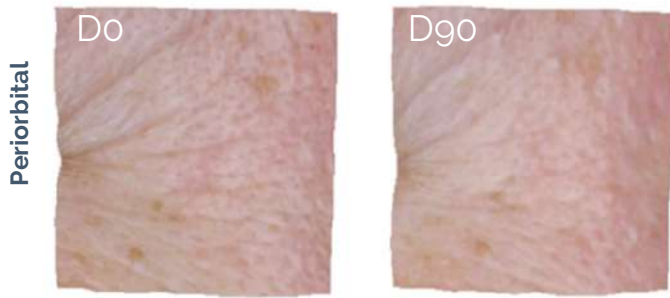

Your ally for beauty-from-within and joint health

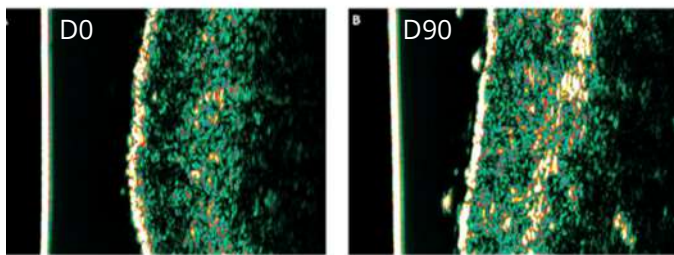

Clinical studies demonstrated its efficacy and mechanisms on **beauty-from-within** and **joint health**

Cartidyss® significantly **reduces wrinkles** (-25%) and **boosts elastin** (+40%) and **hyaluronic acid** (+5,4%) synthesis.

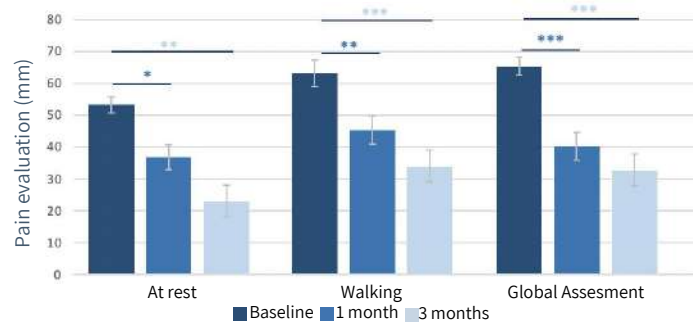

Wrinkles are visibly reduced after 90 days of Cartidyss® supplementation

Cartidyss® significantly improves **dermis density** (+43%), which helps plumping the skin.

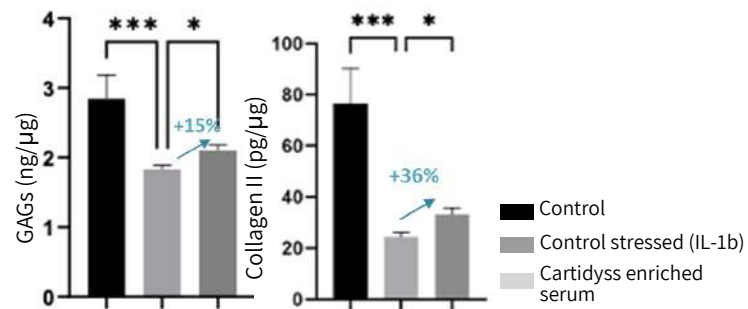

Comparison of dermis density before and after 90 days of Cartidyss® oral supplementation

Cartidyss® significantly **reduces joint pain** (-50%), and **improves mobility**, which has a positive impact on **quality of life**.

Joint pain is significantly reduced as from 1 month of Cartidyss® supplementation, and continues to decrease to reach -50% after 3 months

Cartidyss® **limits cartilage inflammation** and protects it from **degradation**.

Cartidyss®, by limiting the inflammation, prevents from collagen and GAGs loss, and preserves joint mobility.

Neutral taste and smell,
fine powder:
infinite possibilities!
