let's meet

Let's meet to discuss which branded and clinically studied ingredients we offer for the health areas of your interest.

At our meeting, we can present the ingredients' **specifications, advantages, mechanisms of action,** and **product examples.**

hydrolyzed marine collagen (62% collagenic proteins) from fish cartilage for joint health and skin support, with a synergetic action of its components

- **supplier**
Abyss Ingredients
- **product grade**
powder suitable for tablets, capsules, sticks, liquid, soft gels, and liquid forms
- **daily dose**
clinically validated 500 mg for skin and 1g for joint health
- **stability**
36 months shelf life
- **certificates**
Halal, Non-GMO

INDICATIONS
JOINT HEALTH
SKIN HEALTH & BEAUTY

advantages:

- synergistic action of collagen peptides (type II) and glycosaminoglycans (chondroitin sulfate, glucosamine sulfate, hyaluronic acid)
- highly digestible and bioavailable low molecular weight peptides (>85% peptides <3000 Da)
- low dosage
- gentle eco-friendly water extraction, no solvents or preservatives
- relatively neutral in taste and odor, allowing a variety of formulations

mechanisms of action:

- improves joint comfort and mobility, leading to an improved quality of life
- helps limit the production of pro-inflammatory molecules, leading to pain reduction
- promotes maintaining the cartilage extracellular matrix that preserves joint mobility
- reduces wrinkles and smooths skin texture because of its effect on deeper skin layers
- increases elastin (+40%) and hyaluronic acid (+5%) synthesis, ensuring elasticity, firmness, and hydration
